

CHRISTOPHER OJEDAYO

Cloud and DevOps Engineer

ojedayochristopher@gmail.com | +234 816 822 8747 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)
Lagos, Nigeria | Open to remote and EU relocation with visa sponsorship

PROFESSIONAL SUMMARY

Cloud and DevOps Engineer with 2+ years of hands-on production experience designing, automating, and operating cloud infrastructure on Azure and AWS. Proven track record deploying containerised workloads to Kubernetes (AKS, EKS), building zero-downtime CI/CD pipelines with GitHub Actions, and provisioning secure, scalable infrastructure with Terraform. Delivered two complete end-to-end deployments: an Azure AKS tooling platform and an AWS ECS Fargate full-stack application, both with real TLS, DNS, monitoring, and documented architecture. Open to Cloud & DevOps opportunities across Europe with visa sponsorship.

TECHNICAL SKILLS

Cloud	Azure (AKS, ACR, VMs, VNet, App Service, Storage, NSG, Load Balancer) and AWS (ECS Fargate, ECR, ALB, RDS, ElastiCache, Secrets Manager, CloudWatch, ACM, VPC)
Containers and Orchestration	Kubernetes (AKS, EKS) · Docker · Helm · ECS Fargate · NGINX Ingress · cert-manager
IaC and Automation	Terraform (modular, remote state) · Ansible · Bash scripting
CI/CD	GitHub Actions · Docker multi-stage builds · ECR and ACR image management · Rolling deployments
Observability	Prometheus · Grafana · CloudWatch Container Insights
Security	IAM and RBAC · AWS Secrets Manager · Azure Key Vault · TLS and cert-manager and ACM · Security groups
Networking	VPC and VNet design · Subnets · NAT Gateway · Cloudflare Tunnel · DNS and CDN
Languages	Bash · Python · JavaScript and Node.js · Go · YAML
Databases	MySQL (RDS, StatefulSet) · Redis (ElastiCache) · PostgreSQL

PROFESSIONAL EXPERIENCE

Cloud and DevOps Engineer Hagital Consulting · Freelance	June 2024 to Present Remote, Nigeria
- Architected and delivered two production cloud deployments end to end: a PHP tooling web app on Azure AKS and a full-stack Node.js and React application on AWS ECS Fargate, both with HTTPS, monitoring, and documented architecture. - Provisioned and managed cloud infrastructure on Azure and AWS using modular Terraform with remote state, reducing infrastructure provisioning time by over 60%. - Built 4-stage GitHub Actions CI/CD pipelines covering automated testing, Docker multi-stage image builds, Trivy security scanning, and rolling ECS or Helm deploys with automatic rollback on failure. - Deployed and operated Kubernetes clusters on AKS with NGINX Ingress, cert-manager DNS-01 TLS, Helm charts, HPA autoscaling, and Prometheus and Grafana observability. - Implemented zero-downtime ECS Fargate deployments using <code>deployment_minimum_healthy_percent=100</code>, circuit-breaker rollback, and ALB health-check gating with no user-facing outage across all production updates. - Designed secure three-tier VPC architecture on AWS with public and private subnet isolation, ALB-only ingress, ECS tasks in private subnets, and least-privilege IAM scoped per service. - Managed secrets using AWS Secrets Manager and Azure Key Vault so credentials never appear in source code, task definitions, or CI/CD configuration.	

- ▶ Resolved ISP-level Azure IP blocking affecting Nigerian users by engineering a Cloudflare Tunnel solution deployed as a Kubernetes workload, documented as an architectural decision in the project README.
- ▶ Automated configuration of 20 or more Linux VMs using Ansible playbooks, standardising server setup and eliminating manual configuration errors.

Co-Founder and Operations Manager

Hocia Limited (Recycling Enterprise)

May 2023 to May 2024

Abuja, Nigeria

- ▶ Founded and scaled a recycling operation managing a cross-functional team of 47 people, developing the systems thinking and project management discipline directly applied to DevOps workflow design today.
- ▶ Designed operational workflows, implemented inventory tracking systems, and managed budget allocation across multiple departments.

WordPress Web Designer and Digital Marketer

Ocia Multi-service Enterprise

Oct 2018 to May 2023

Nigeria

- ▶ Designed, deployed, and maintained WordPress websites for business clients, managing hosting environments, domains, SSL certificates, performance, and uptime.
- ▶ Built production web systems experience covering DNS, SSL, and server troubleshooting years before formally entering cloud engineering.

KEY PORTFOLIO PROJECTS

FeedbackHQ AWS Full Stack Production Deployment

GitHub: github.com/kristarking/feedbackhq

Three-tier Node.js and React application deployed on AWS ECS Fargate. Modular Terraform across 7 modules (VPC, ALB, ECS, RDS, ElastiCache, IAM, ECR). 4-stage GitHub Actions pipeline with Jest tests against live MySQL and Redis service containers, Docker multi-stage builds, Trivy scanning, and rolling ECS deploys with circuit-breaker rollback. Zero-downtime deployments. AWS Secrets Manager for all credentials. CloudWatch Container Insights for observability. Cloudflare in front of the ALB. Full architecture diagram and deployment guide in the README.

Stack: AWS ECS Fargate · RDS MySQL · ElastiCache Redis · ALB · Terraform · GitHub Actions · Docker · Secrets Manager · CloudWatch · Cloudflare · ACM

Tooling Web App Azure AKS Production Deployment

GitHub: github.com/kristarking/tooling-project

PHP tooling application deployed to Azure Kubernetes Service. Infrastructure provisioned with Terraform. CI/CD via GitHub Actions. TLS via cert-manager with Let's Encrypt DNS-01 challenge over Cloudflare API. Prometheus and Grafana monitoring. Resolved ISP-level Azure IP blocking in Nigeria by deploying a Cloudflare Tunnel as a Kubernetes workload inside AKS, documented as an architectural decision. Full troubleshooting journal covering ACME failures, NSG rule bugs, and region migration included in the README.

Stack: Azure AKS · ACR · Terraform · GitHub Actions · Helm · cert-manager · Cloudflare Tunnel · Prometheus · Grafana · MySQL StatefulSet

Node.js CI/CD Pipeline

GitHub: github.com/kristarking/cloud-devops-portfolio

Containerised Node.js application built and deployed via GitHub Actions. Image pushed to Docker Hub and deployed to an Azure VM with Docker Compose and NGINX reverse proxy.

Stack: Docker · GitHub Actions · NGINX · Azure VM

Go Application on AKS with Helm

Containerised Go application deployed to Azure Kubernetes Service using Helm charts with Ingress Controller and autoscaling configuration.

Stack: Go · Docker · AKS · Helm · Kubernetes

EDUCATION

Bachelor of Arts in Performing Arts

Graduated 2018

University of Ilorin, Nigeria | Transitioned into DevOps through hands-on cloud projects, professional practice, and continuous self-learning.

CERTIFICATIONS AND DEVELOPMENT

- ▶ Microsoft Azure Administrator Associate (AZ-104) In Progress
- ▶ Target certification sequence: AZ-104, then AWS Solutions Architect Associate, then CKA
- ▶ Self-directed study in Kubernetes administration, AWS architecture, and advanced Terraform patterns

COMMUNITY AND CONTENT

- ▶ Technical content creator on TikTok and YouTube, producing DevOps tutorials and cloud engineering walkthroughs aimed at career-switchers in Nigeria.
- ▶ Published technical articles on Dev.to/kristarking documenting real infrastructure deployments, CI/CD patterns, and troubleshooting journeys.
- ▶ Cloud and DevOps instructor at Hagital Consulting delivering structured cohort curriculum from Azure fundamentals through Terraform, Docker, and GitHub Actions.
